1. (Currently Amended) An apparatus for providing a specific access space that specifies a path specific to a user who searches a hyperlink in a hypertext space composed of mutual link relation between one or more hypertexts provided by one or more servers, comprising:

first means for adding space identification information to specific information for each user associated with the specific access space relative to page information and managing it in correlation with a reference to the page information, wherein the specific access space specifies ~~the~~ a virtual hypertext space that is in conformance with a purpose of users and wherein a link relation different from an original hypertext space is formed;

second means for taking specific information corresponding to requested page information out of the first means and adding it to the page information; and

third means for replacing the reference included in the page information with the space identification information.
